DESCRIPTION:

DSPL Model No. "**DSPL-ASSETRACK**" is an RFID Asset Tracking System that is a powerful tool for easily tracking and managing your assets in real time. Using RFID technology, our system provides accurate and reliable information on your assets' location, status, and movement, allowing you to make informed decisions and optimise your operations.

RFID ASSET TRACKING

FEATURES:

- ASSETRACK Software easily tracking and managing your assets in real time.
- Complete RFID System Configurations.
- All types of Reports Generation (Inventory/ Auditing/ Located/ Miss Located/ Missing).
- Unlimited Asset/user Add.

ASSETRACK:

- **Increased Efficiency:** Our system allows you to quickly locate and track your assets, reducing the time and effort required for manual tracking methods.

- **Improved Accuracy:** Our system ensures highly accurate data on the location and status of your assets, providing a secure environment and minimizing the risk of lost or misplaced assets.

- **Real-time Control:** Our system offers instant visibility into the location and status of your assets, empowering you to make informed decisions and optimize your operations.

- **Labor Cost Reduction:** Automating procedures like asset check-in and check-out reduces labour and time. Additionally, stock verification becomes more efficient without closures.

- **Workflow Optimization:** Tracked assets enable workflow optimization and real-time inventory management and minimise the risk of human error.
